Our Surface Characterization Lab provides high-precision analytical services in surface science, nanoanalytics and material testing. We deliver reliable insights into the physical, chemical and mechanical properties of surfaces and thin films for research, industry and quality assurance.

Get Insight into the...

- Surface Topography on a Micro- to Nanolevel
- Chemical Element Composition and Bonds
- Wetting Properties
- Hardness, Adhesion and Tribologic Properties
- Electrical Characteristics (up to High Voltage Range)
- Optical Response
- Cross Section Composition

Our Solutions

- Expert Analytical Services
- Collaborative Research Projects
- Custom Method Development
- Access to ISO Class 6 Cleanroom Infrastructure
